# Datasheet M-Duino 54ARA+ WiFi & BLE

### Technical Features CONECTABLE PLC ARDUINO 24Vcc M-DUINO

M-Duino HF WiFi & BLE
12 to 24Vdc (Fuse protection (2.5A) Polarity protection)
24Vdc
30 W
1.5A
101x119.3x119.5
16MHz
256KB of which 8KB used by bootloader
8KB
4KB
12C, Ethernet, USB, RS485, RS232, SPI   (2x) Rx, Tx (Arduino pins), WiFi, BLE, Max232-Max485-W5500
Only for uploading or debugging. NOT connected as a serial Cannot be working in a final application

#### General Features

Power supply voltageDC power supply12 to 24VdcOperating voltage rangeDC power supply11.4 to 254VdcPower consumptionDC power supply30 W MAXExternal power supplyPower supply voltage24VdcPower supply voltage700MaInsulation resistance2300 VAC at 50/60 Hz to me minute with a leakage current of 10mA max Between all the external AC terminals and the protective ground terminal.Shock resistance80m/s2 in the X Y and Z times each.Ambient temperature (operating)0' to 60'CAmbient humidity (operating)10% to 90% (no condensational conditional			
Power consumption   DC power supply   30 W MAX.     External power supply   Power supply voltage   24Vdc     Power supply voltage   700Ma     Insulation resistance   20MQ minat 500Vdc between the AC terminals and the protective earth terminal.     Dielectric strength   2.300 VAC at 50/60 Hz for one minute with a leakage current of 10mA max. Between all the external AC terminals and the protective ground terminal.     Shock resistance   80m/s2 in the X, Y and Z direction 2 times each.     Ambient temperature (operating)   0' to 60'C	Power supply voltage	DC power supply 12 to 24Vdc	
External power supply   Power supply voltage   24Vdc     Power supply voltage   700Ma     Insulation resistance   20MΩ minat 500Vdc between the AC terminals and the protective earth terminal.     Dielectric strength   2.300 VAC at 50/60 Hz for one minute with a leakage current of 10mA max between all the external AC terminals and the protective ground terminal.     Shock resistance   80m/s2 in the X, Y and Z direction 2 times each.     Ambient temperature (operating)   0' to 60'C	Operating voltage range	DC power supply	11.4 to 25.4Vdc
Power supply voltage 700Ma   Insulation resistance 20MQ minat 500Vdc between the AC terminals and the protective earth terminal.   Dielectric strength 2.300 VAC at 50/60 Hz for one minute with a leakage current of 10mA max. Between all the external AC terminals and the protective ground terminal.   Shock resistance 80m/s2 in the X, Y and Z direction 2 times each.   Ambient temperature (operating) 0° to 60°C	Power consumption	DC power supply	30 W MAX.
Insulation resistance   20MQ minat 500Vdc between the AC terminals and the protective earth terminal.     Dielectric strength   2.300 VAC at 50/60 Hz for one minute with a leakage current of 10mA max. Between all the external AC terminals and the protective ground terminal.     Shock resistance   80m/s2 in the X, Y and Z direction 2 times each.     Ambient temperature (operating)   0° to 60°C	External power supply	Power supply voltage	24Vdc
Instruction resistance   terminals and the protective earth terminal.     Dielectric strength   2.300 VAC at 50/60 Hz for one minute with a leakage current of 10mA max Between all the external AC terminals and the protective ground terminal.     Shock resistance   80m/s2 in the X, Y and Z direction 2 times each.     Ambient temperature (operating)   0° to 60°C		Power supply voltage	700Ma
Ieakage current of 10mA max.     Between all the external AC terminals and the protective ground terminal.     Shock resistance   80m/s2 in the X, Y and Z direction 2 times each.     Ambient temperature (operating)   0° to 60°C	Insulation resistance		
Ambient temperature (operating) 0° to 60°C	Dielectric strength	leakage current of 10mA max. Between all the external AC terminals and the	
	Shock resistance		
Ambient humidity (operating)     10% to 90% (no condensation)	Ambient temperature (operating)	0° to 60°C	
	Ambient humidity (operating)	10% to 90% (no condensation)	
Ambient environment (operating) With no corrosive gas	Ambient environment (operating)	With no corrosive gas	
Ambient temperature (storage) -20° to 60°C	Ambient temperature (storage)	-20° to 60°C	
Power supply holding time 2ms min.	Power supply holding time	2ms min.	
Weight 597g max.	Weight	597g max.	

### INPUTS (x29)

An/Dig Input 10bit (0-10Vcc) - (x14)	0 to 10Vac Input Impedance: 39K Separated PCB ground Rated Voltage: 10Vac 7 to 24Vdc I min: 2 to 12 mA Galvanic Isolation Rated Voltage: 24 Vdc	
Digital Isolated Input (24Vcc) - (x9)	7 to 24Vdc I min: 2 to 12 mA Galvanic Isolation Rated Voltage: 24 Vdc	0
Interrupt isolated Input HS (24Vcc) * - (x6) * The Interrupt isolated Inputs can also work as Digital isolated Inputs	7 to 24Vdc I min: 2 to 12 mA Galvanic Isolation Rated Voltage: 24 Vdc	(

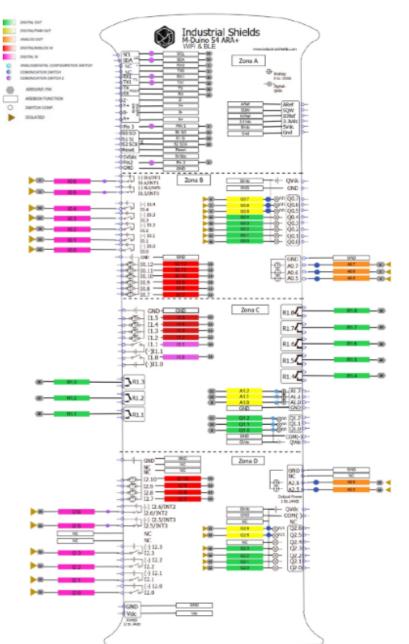

Expandability

I2C - 127 elements - Serial Port RS232/RS485

### OUTPUTS (x25)

Analog Output 8bit (0-10Vcc) - (x8) • The Analog outputs can also work as Digital outputs	0 to 10Vac I max: 20 mA Separated PCB ground Rated Voltage: 10Vac
Digital Isolated Output (24Vcc) - (x9)	5 to 24Vdc I max: 70 mA Galvanic Isolation Diode Protected for Relay Rated Voltage: 24Vdc
Digital Isolated Output Relay - (x8)	220V Vdc I max: 5A Galvanic Isolation Diode protected for Relay
	Imax 24Vdc: 410 mA
PWM Isolated Output 8bit (24Vcc) - (x8) • The PWM outputs can also work as Digital outputs	5 to 24Vdc I max: 70 mA Galvanic Isolation Diode Protected for Relay Rated Voltage: 24Vdc

\*Pins used for WiFi module

# Industrial Shields

### Performance Specifications

Arduino Board	Arduino Mega 2560	
Control method	Stored program method	
I/O control method	Combination of the cyclic scan and immediate refresh processing methods.	
Programming language	Arduino IDE. Based on wiring (Wiring is an Open Source electronics platform composed of a programming language. "similar to the C")	
Microcontroller	ATmega2560	
	http://arduino.cc/en/Tutorial/HomePage	

### Install Arduino IDE and the Industrial Shields boards

Install Arduino IDE and the industrial Shields doards	warnings
The steps to follow to install our equipment's to Arduino IDE are:	Unused pins should not be connected. Ignoring the directive may damage the controller.
$\cdot$ Open the Arduino IDE, versión 1.8.0 or superior. If you don't have it yet , you can download here	Before using this product, it is the responsibility of the user to read the product's User Guide and all accompanying documentation.
https://www.arduino.cc/en/Main/Software .	Industrial Shields PLCs must be powered between 12Vdc and 24Vdc. If a higher voltage is supplied to the equipment can suffer irreversible damage.
Press the "Preferences" option to "File" menu and open the preferences window.	Maintenance must be performed by qualified personnel familiarized with the construction, operation, and hazards involved with the control.
In the text box "Additional boards manager URLs", add the direction: http://apps.industrialshields.com/main/arduino/boards/package_ind	Maintenance should be performed with the control out of operation and disconnected from all sources of power.
ustrialshields_index.json	The Industrial Shields Family PLCs are Open Type Controllers. It is required that you install the M-Duino PLC in a housing, cabinet, or electric control room. Entry to the housing, cabinet, or electric control room should be limited to authorized personnel.
• Click on "Tools" menu, and open the "Boards" submenu, and click the "Boards Manager" option, to open the Boards Manager window.	Inside the housting, cabinet or electric control room, the Industrial Shields PLC must be at a minimum distance from the rest of the components of a minimum of 25 cm, it can be severely damaged.
$\cdot$ Search "industrial shields" to the search filter and select to the list and click "Install"	Failure to follow these installation requirements could result in severe personal injury and/or property damage. Always follow these requirements when installing M-Duino family PLCs.
• Close the "Boards Manager". Once it is performed that steps, you are available to select each PLC that you wish to work on "Tools" -> "Boards": M-Duino	In case of installation or maintenance of the M-Duino please follow the instructions marked in the Installation and Maintenance section on the User Guide.
To get more information: https://www.industrialshields.com/first-steps-with-the-industrial- arduino-based-plc-s-and-the-panel-pc-s-raspberry-pi-based#boards	Do not disconnect equipment when a flammable or combustible atmosphere is present. Disconnection of equipment when a flammable or combustible atmosphere is present may cause a fire or explosion which could result in death, serious injury and/or property damage.

## Technical Support

	83	11
	Indicates that the equipment is suitable for direct current only; to identify relevant terminals	You can contact with us using the best channel for you:
$\sim$	Indicates that the equipment is suitable for alternating current only; to identify relevant terminals	support@industrialshields.com
ГЛ	To identify the control by which a pulse is started.	www.industrialshields.com
	To identify an earth (ground) terminal in cases where neither the symbol 5018 nor 5019 is explicily required.	Visit our Blog, Forum orTicketing system
$\otimes$	To identify the switch by means of which the signal lamp(s) is (are) switched on or off.	Check the user guides
CE	CE marking indicates that a product complies with applicable European Union regulations	Visit our Channel
$\triangle$	Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury	
4	To indicate hazards arising from dangerous voltages
