Industrial Shields Touchberry 10.1" & Tinkertouch 10.1" Datasheet

Technical Features CONECTABLE PANEL PC 24Vcc

MODEL TYPE	Touchberry 10.1" & Tinkertouch 10.1"
Input Voltage	12 to 24Vdc ((2.5A) Polarity protection)
Input rated voltage	24Vdc
Rated Power	28 W
I max.	1.5A
Size	Check the Measures Table
SRAM	2/4/8 GB
Communications	I2C, Ethernet, USB (x4), RS485 (x2 HALF-Duplex), SPI , Wi-Fi, Bluetooth, Serial TTL, RS-232, µSD, RTC,

General Features

Power supply voltage	DC power supply	12 to 24Vdc
Operating voltage range	DC power supply	11.4 to 25.4Vdc
Power consumption	DC power supply	28 W MIN.
External power supply	Power supply voltage	24Vdc
Insulation resistance	20mΩ min.at 500Vdc bet terminals and the protecti	
Dielectric strength	2.300 VAC at 50/60 Hz t leakage current of 10mA r Between all the external A protective ground termina	max. C terminals and the
Shock resistance	80m/s2 in the X, Y and Z 2 times each.	direction
Ambient temperature (operating)	0° to 40°C with Raspberry 0	DS Lite
Ambient humidity (operating)	10% to 90% (no condensat	tion)
Ambient environment (operating)	With no corrosive gas	
Ambient temperature (storage)	-20° to 60°C	
Power supply holding time	2ms min.	
Weight	1.673 gr.	

Touch Screen Specifications

Technology	Capacitive Touch Panel, 900 Nits. RTD2662 controller chip.
Image Resolution	1280 x 800
Format	16:9
Size	10.1"
Display Technology	ТFT Туре
Screen Type	IPS Display

Bottom side

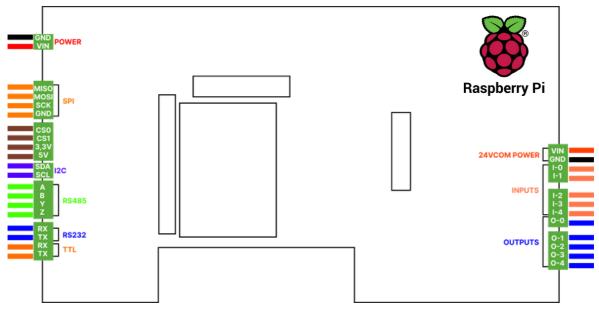

Left side I

-

USB 2.0 Image: Constant of the second second

Pinout Scheme

Additional Specifications

UPS Service	GPIO_23: RPI's shutdown detector GPIO_24: RPI's power failure warning
RS-485's mode	Configurable by jumper, can be FD or HD
SPI Voltage Level	Configurable by jumper, can be 3,3V or 5V
I2C Voltage Level	Configurable by jumper, can be 3,3V or 5V
Screen's Power Supply	12V @ 2 A
Screen Controller	GT9271

I/Os distribution

Inputs:

- 3 Digital Inputs.
- 2 Analog Inputs, configurable by jumpers to be:
 0 10 Vdc or 4 20 mA

Outputs:

- 5 Digital Outputs.
- Must be powered between 7.5-24 Vdc in its correspondent pins.

Working with I/Os

Interaction with I/Os is possible through Bash Scripts, Python Scripts and Terminal commands with easy syntax. Consult the User Guide for more information about this type of scripts.

Screen Configuration Menu

Brightness	Brightness can be adjusted in the Color Menu that can be accessed with the first button located behind the screen
Contrast	Contrast can be adjusted in the Color Menu that can be accessed with the first button located behind the screen
Saturation	Saturation can be adjusted in the Color Menu that can be accessed with the first button located behind the screen
Sound	Sound can be adjusted using the two last buttons located behind the screen.
Sleep Mode	The screen can be put in Sleep Mode using the second button located behind the screen. Pressing the button again will wake up the screen
Display Port	The display port can be changed to HDMI or VGA using the middle button located behind the screen. Industrial Shields Panel PC does not support VGA connection as VGA port is not connected

Notes

 There are XXX on the reference number show: First two characters are related to the expansion modules connected to the PLC unit and the RAM Memory model. 				
	- The third character is related to the CPU RAM memory			
	space:			
		See the Reference Table. Example:		
	0	xxxxx2xxxxxx - 2GB RAM Memory		
	0	xxxxx3xxxxxx - 4GB RAM Memory		
	0	xxxxx4xxxxxxx - 8GB RAM Memory		

2. The analog inputs has a 3% of tolerance.

I/Os Ranges

- Analogic Input voltage: 0 10 Vdc.
- Analogic Input current: 4 20 mA.
- Digital I/Os voltage: 5 24 Vdc.
- Digitial I/Os current: 250 mA.

Main changes compared to previous versions

- Introduction of I/Os in the new Touchberry 10.1" & Tinkertouch 10.1" Panel PC .
- 5 Digital Ouputs, 3 Digital Inputs and 2 Analog Inputs overall.
- New communications have been added: RS-485 HD/FD, RS232 and Serial TTL.
- The Screen is now Capacitive.

1 X1 EXPANSION BOARD SLOTS

Customize one additional communication expansion on your Panel PC and prepare your custom-made project

Performance Specifications

4

To indicate hazards arising from dangerous voltages

Raspberry Board	Raspberry Pi 4 B
I/O control method	Combination of the cyclic scan and immediate refresh processing methods.
Programming language	Linux applications: Bash Scripts, Python and more!.
CPU	Broadcom BCM2711, Quad core Cortex-A72 (ARM v8) 64-bit SoC @ 1.5GHz
Website	https://www.raspberrypi.org/

Panel PC Access	Warnings
How to access to the Panel PC's Raspberry:	Unused pins should not be connected. Ignoring the directive may damage the controller.
-Linux users: using ssh specifying the IP address: 10.10.10.20 (eth0).	Before using this product, it is the responsibility of the user to read the product's User Guide and all accompanying documentation.
-Windows users: we recommend to use PuTTY ssh client. The IP address have to be specified: 10.10.10.20/24 (eth0).	Industrial Shields PLCs must be powered between 12Vdc and 24Vdc. If a higher voltage is supplied to the equipment can suffer irreversible damage.
You can download the latest release of PuTTY here: https://www.chiark.greenend.org.uk/~sgtatham/putty/latest.html	Maintenance must be performed by qualified personnel familiarized with the construction, operation, and hazards involved with the control.
	Maintenance should be performed with the control out of operation and disconnected from all sources of power.
UPS Shield This Panel PC has integrated an UPS Shield, a device which provid an anti-voltage drop protection system designed to avoid da corruption when the current is suddenly cut off.	required that you motall the ratio relation of the modeling, capitot, or cleatio
RTC This Panel PC has integrated the DS3231 Real Time Clock mod	Inside the housing, cabinet or electric control room, the Industrial Shields PLC must be at a minimum distance from the rest of the components of a minimum of 25 cm, it can be severely damaged.
which is powered by a button battery (CR1216 or CR1220).	Failure to follow these installation requirements could result in severe personal injury and/or property damage. Always follow these requirements when installing Panel family PCs.
Outputs After a reboot/power disconnection and reconnection, the UPS v	
be activated and, until the device is fully initialized again (it will ta some seconds), the outputs will maintain their last activation sta For more information about that consult the User Guide.	
	Disconnection of equipment when a flammable or combustible atmosphere is present may cause a fire or explosion which could result in death, serious injury and/or property damage.
	Inside the encapsulated, there are supercapacitors of 25F which can be dangerous. Be careful with them.
Symbology	Technical Support
Indicates that the equipment is suitable for direct current only, to identify relevant terminals	
\sim Indicates that the equipment is suitable for alternating current only; to identify relevant terminals	support@industrialshields.com
To identify the control by which a pulse is started.	www.industrialshields.com
To identify an earth (ground) terminal in cases where neither the symbol 5018 nor 5019 is explicitly required.	Visit our Blog, Forum or Ticketing system
To identify the switch by means of which the signal lamp(s) is (are) switched on or off.	Use our chat service
CE marking indicates that a product complies with applicable European Union regulations	E Check the user guides
Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury	Check the user guides
